

REMARKS

The instant application is a divisional application of U.S. Patent Application Serial No. 09/138,064 filed August 21, 1998, which is a divisional of U.S. Patent Application Serial No. 08/664,033 filed June 13, 1996, now U.S. Patent No. 5,812,332, which is a divisional of U.S. Patent Application Serial No. 08/038,749 filed March 26, 1993, now abandoned, which is a continuation-in-part of U.S. Application Serial No. 07/747,765 filed August 20, 1991, now abandoned, which is a continuation-in-part of U.S. Application Serial No. 07/654,408 filed February 8, 1991, now abandoned, which is a continuation of U.S. Application Serial No. 07/414,492 filed September 28, 1989, now abandoned. Claim 42 of the instant application recites that the outer major surfaces of the laminate as recited in claim 41 are angularly offset from each other by at least about 0.0115° within the second predetermined area of the laminate. This angular offset is based on the interlayer shown in Figure 6 and the dimensions of the interlayer as disclosed at page 18, line 21, through page 19, line 19, of the instant application. As a result, the inclusion of the angular offset does not constitute new subject matter.

Respectfully submitted,

ANDREW C. SIMINERIO
